Psychology

Program Overview
Psychology aims at giving students an understanding of the human mind and behavior. We offer Major and Honours programs that emphasize Psychology as an objective science, cover the various subfields of Psychology and allow the students who desire to do so to gain specialization into specific areas of interest. We also offer a Minor in Psychology, a Minor in Mindfulness and Contemplative Studies, a one-year Certificate in Human Psychology, as well as Graduate Certificate in Knowledge Mobilization, 15-credit program including practicum.

Within this general framework, we offer an array of courses that apply the psychological approach to a wide range of topics. We emphasize quality of teaching and a close relationship between professors and students. A fundamental concern of the Department is to provide an education that not only prepares students for further training in Psychology and related fields at the graduate level, but also enables them to be active, contributing members to their communities.

Mission Statement
The Psychology Department dedicates itself to understanding and supporting our shared journey toward a well-lived life. Our approach, therefore, takes seriously the literary voice of others cast across time. We explore the pathways into human condition by cultivating openness to scientific methodology, and to clinical, humanistic, as well as neuropsychological perspectives. Encouraging ways of breaking out of the classroom in the hope of making the lives of others better is as much a part of our mission as conducting a study, reading Plato, or deciphering an MRI report. Our goal is to nurture within our students an intimacy with the human condition that changes them while, at the same time, providing them with the means of making their communities better.

Prerequisites
Note that all prerequisites can be completed at Bishop’s.
All our programs include two Introduction to Psychology prerequisites (PSY 101 and PSY 102). Our Majors/Honours programs also include an Introductory Biology (BIO 196/BIL 196 or BIO 194) prerequisite. These courses must be completed within the first three semesters of study. These prerequisites will be waived for students who have completed CEGEP courses in Psychology (Introductory Psychology and two other Psychology courses) and Human Biology. Our psychology – neuroscience program includes additional science prerequisites; these will be waived for CEGEP science students.

Psychology Programs
Please note that the complete list of courses to be taken within each program is outlined in the table on the next page.

Honours and Major in Psychology
(60 and 78 credits) HONPSY/MAJPSY
This classic program is our most flexible and most popular. The Major includes 24 credits of Core Courses and 30 credits of Psychology options for a total of 54 credits. The Honours adds an additional 18 credits of Core Courses for a total of 72 credits.

Special Requirements for Honours
To qualify for an Honours program, students must have a cumulative average of at least 80% in program courses. Students must also achieve a combined average of at least 75% in PSY 313 (Advanced Research Methods) or PSY 462 (Qualitative Methods) and PMA 360 (Advanced Psychological Statistics). Eligible students will officially transfer into Honours after the acceptance of their Thesis proposal in the Fall term of their final year.

Major in Psychology – Humanistic Concentration
(54 credits) MAJPSH
This program is our most flexible and is designed for the student looking to truly benefit from the liberal arts experience, while completing a major in psychology. The Major includes 39 credits of Core courses and 15 credits of options, for a total of 54 credits. Students coming from CEGEP may receive advanced credits for PSY 101, PSY 102 and PMA 113, reducing the Core credits count to 30.
Honours or Major in Psychology – Neuroscience Concentration (B.Sc.; 81 or 102 credits) HONPNS/MAJPNS
This program focuses on the physiological aspects of Psychology and the brain-behavior relationship. To complete the neuroscience program within three years, Quebec students should enter with a collegial diploma in science (D.E.C.), that includes Mathematics 201-NYA-05, 201-NYB-05, Physics 203-NYA-05, 203-NYB-05, Chemistry 202-NYA-05, 202-NYB-05, and Biology 101-NYA-05. Students entering from other CEGEP programs or from Grade 12 will be required to complete science prerequisites prior to undertaking the neuroscience major and will usually complete the degree in four years. The major includes 39 credits of core courses and 15 credits of Psychology and Science options for a total of 54 credits. The Honours adds an additional 18 credits for a total of 72 credits.

Honours or Major in Psychology – Pre-Clinical Concentration (69 or 93 credits) HONPPC/ MAJPCC
This program emphasizes the applied/clinical side of psychology. The major includes 39 credits of Core courses and 30 credits of options, for a total of 69 credits. The Honours option adds 18 credits of Core courses and 6 credits of Honours courses specific to the application of psychology, for a total of 93 credits. Students coming from CEGEP may receive advanced credits for PSY 101 and PSY 102, reducing the Core credits count to 33 (51 for Honours)

Minor in Psychology (24 credits) MINPSY
The Minor involves completing any 8 courses in Psychology. This flexible and popular program has been joined with Majors/Honours in almost every discipline offered at Bishop’s. The most popular and most useful combinations include, among others: Biology, Political Studies, Sociology, Business, Philosophy, English and Education.

Minor in Mindfulness and Contemplative Studies (24 credits) MINPMC
This program provides students with a platform to investigate the psychological, philosophical, and scientific bases of human contemplative experience. It will prepare students who are thinking about clinical work using mindfulness-based interventions; those who are planning research in the area of contemplative neuroscience; as well as those who want to deepen the understanding of themselves and the world they live in. This is an interdisciplinary Minor, involving courses in Psychology and Humanities, to facilitate exploration of human consciousness, nature of self, and life meaning. It requires 8 courses (24 credits), two of which are mandatory (PSY 298 & PSY 420). The remaining six courses can be chosen from a pre-selected list of courses from a wide range of departments listed below:

A. Psychology
PSY 298 – Zen & the Brain (mandatory)
PSY 303 – Positive Psychology
PSY 408 – Psychology of Consciousness
PSY 410 – Psychology of Death & Dying
PSY 420 – Contemplative Practicum (mandatory)
PSY 292 – Psychology of Music and the Fine Arts

B. Religion, Society and Culture
RSC 101 – Eastern Religions
RSC 124 – Hinduism: The Many Faces of the Divine
RSC 125 – Buddhism: The Middle Way
RSC 148 – Psychology of Religion
RSC 236 – Death & Dying in the Ancient World

C. Liberal Arts
LIB 216 – The Divine & Ultimate Concern
LIB 303 – On the Road Again: Pilgrimage in Theory and Practice

D. Philosophy
PHI 201 – Medieval Philosophy
PHI 263 – Hegel
PHI 271 – Socrates and Plato
PHI 272 – Aristotle
PHI 354 – The Philosophy of Contemplation
PHI 374 – Spinoza

E. Fine Arts
FIS 169 – Drawing I
FIS 170 – Sculpture I
FIS 181 – Painting I
FIN 222 – Art Therapy

F. Music
MUS 108 – Choral & Sacred Music
MUS 110 – The Art of Listening I
MUS 111 – The Art of Listening II

G. Other
DRA 131 – Acting I
BIO 111 – Organic Gardening

Certificate in Human Psychology (30 credits) CONPSH
This one-year program is designed for adult students. It has particular relevance for teachers, health or social workers, and managers. It involves taking 10 psychology courses that relate to human behavior.
## B.A. Psychology
Complete the Core, Humanities, Biology, Physiology, Cognition & Motivation, Development, and Social blocks (60 credits)

### Core
- **PSY 101** Introduction to Psy. I
- **PSY 102** Introduction to Psy. II
- **PCS 207** Cognition
- **PSY 206** Personality
- **PSY 213** Research Methods
- **LIB 218** Hist. & Phil. of Science
- **PSY 235** Child Development
- **PSY 245** Fund. Social Psychology
- **PMA 260** Psychological Statistics
- **PBI 288** Brain & Behaviour
- **PSY 235** Child Development
- **PSY 245** Fund. Social Psychology
- **PMA 260** Psychological Statistics
- **Plus, at least one of:**
  - **PSY 301** Abnormal Psychology
  - **PSY 311** Psychopathology

### Humanities (at least 1)
- **LIB 210** Eros, Love & Desire
- **LIB 212** In Search of Justice
- **LIB 217** Towards Spatial Justice
- **RSC 100** Middle Eastern Matrix: Religions of the Wests
- **RSC 101** Asian Origins: Religions of the East
- **RSC 148** Psychology of Religion
- **RSC 204** Women in Religion
- **CLA 100** Food, Comm & Culture
- **CLA 102** Ancient Greece: Hist/Cult.
- **CLA 112** Ancient Greek Mythology
- **CLA 250** Sex in the Ancient World
- **PHI 100** On the Way to the Good
- **PHI 101** On Thinking Well
- **PHI 105** Freedom, Anxiety, Auth.
- **PHI 244** Philosophy of Mind
- **ENG 205** The Art of Persuasion
- **FIH 240** Art, Popular Culture

### Biology (at least 1)
- **BIO 131** The Human Body
- **BIO 194** General Biology
- **BIO/L 196** Intro. Cell & Mol. Biology

### Physiology (at least 1)
- **PBI 379** Neuropsychology
- **PBI 380** Psychopharmacology
- **PBI 388** Brain & Behaviour II

### Cognition & Motivation (at least 1)
- **PSY 203** Cognition & Motivation
- **PBI 217** Motivation & Emotion
- **PSY 302** Perceptron
- **PCS 307** Cognitive Processes
- **PSY 370** Learning & Memory
- **PSY 386** Psychology of Language

### Development (at least 1)
- **PSY 266** Adult Aging
- **PSY 290** Adolescence
- **PSY 333** Exceptional Child Dev.
- **PSY 348** Social Development*

### Social (at least 1)
- **PSY 204** Social Psy. of Sports
- **PSY 214** Community Psychology
- **PSY 219** Psychology of Gender
- **PSY 246** Social Psychology II
- **PSY 293** Multicultural Psychology
- **PSY 348** Social Development*
- **PSY 330** Psychology and Ethics

* This course can contribute to only one block

### Honours Option
(18 additional credits)
- **PSY 313** Adv. Research Methods or PSY462 Qualitative Methods
- **PSY 443** History of Psy. Seminar
- **PSY 498** Honours Seminar
- **PSY 499** Honours Thesis (6 credits)
- **PMA 460** Multivariate Statistics

The Honours adds 18 credits, for a total of 78 credits. To qualify for the Honours option, students must have a cumulative average of at least 80% in their major courses. Students must also achieve a combined average of at least 75% between PSY 313 and PMA 360 or at least 75% between PSY462 (Qualitative Methods) and PMA360.

(See page 232 for additional details)

### Typical First Year
**From CEGEP**
- **Fall:** PSY 206, PMA 260, PSY 235, PBI 288, Elective or Biology block
- **Winter:** PCS 207, PSY 301 or PSY 311, PSY 213, PMA 360, Elective or Biology block

**From High School**
- **Fall:** PSY 101, PSY 102, Elective or Humanities block, Elective or Biology block, Elective
- **Winter:** PSY 206, PBI 288, PCS 207, Elective or Humanities block, Elective or Biology block

### Typical Second Year
**From CEGEP**
- **Fall:** PSY 245, Development block, Elective or Humanities block, Cognition or Physiology block, LIB 218 or Elective
- **Winter:** PMA 353, Social block, Cognition or Physiology block, Elective or LIB 218, Elective

**From High School**
- **Fall:** PMA 260, PSY 301 or PSY 311, PSY 235, PSY 245, Elective
- **Winter:** PSY 213, PMA 360, Development block, Cognition or Physiology block, Elective

### Typical Third Year
**From CEGEP**
- **Fall:** PSY 342, Elective or Humanities block, plus 3 Electives
- **Winter:** 5 Electives

**From High School**
- **Fall:** LIB 218 or Elective, Cognition or Physiology block, Social block, plus 2 Electives
- **Winter:** PMA 353, Elective or LIB 218, plus 3 Electives

### Typical Fourth Year
**From High School**
- **Fall:** PSY 342, plus 4 Electives
- **Winter:** 5 Electives
**B.A. Psychology – Humanistic**
Complete the Core, Humanities, and Biology blocks, plus two Free Options (54 credits)

### B.A. Psychology - Pre-Clinical
Complete the Core, Humanities, Biology, Physiology, Cognition & Motivation, Development, Social and Applications blocks (69 credits)

#### Core
- PSY 101 Introduction to Psy. I
- PSY 102 Introduction to Psy. II
- PCS 207 Cognition
- PSY 206 Personality
- PSY 213 Research Methods
- PSY 235 Child Development
- PSY 245 Fund. Social Psychology
- PMA 260 Psychological Statistics
- PBI 288 Brain & Behaviour
- PSY 342 History of Psychology
- PMA 353 Psychometrics
- PMA 360 Advanced Statistics

**Plus, at least one of:**
- PSY 301 Abnormal Psychology
- PSY 311 Psychopathology

#### Humanities (at least one of)
- LIB 210 Eros, Love & Desire
- LIB 212 In Search of Justice
- LIB 217 Towards Spatial Justice
- RSC 100 Middle Eastern Matrix: Religions of the Wests
- RSC 101 Asian Origins: Religions of the East
- RSC 148 Psychology of Religion
- RSC 204 Women in Religion
- CLA 100 Food, Comm & Culture
- CLA 102 Ancient Greece: Hist/Cult.
- CLA 112 Ancient Greek Mythology
- CLA 250 Sex in the Ancient World
- PHI 100 On the Way to the Good
- PHI 101 On Thinking Well
- PHI 105 Freedom, Anxiety, Auth.
- PHI 244 Philosophy of Mind
- ENG 205 The Art of Persuasion
- FIH 240 Art, Popular Culture

#### Biology (at least 1)
- BIO 131 The Human Body
- BIO 194 General Biology
- BIO/L 196 Intro. Cell & Mol. Biology

#### Physiology (at least 1)
- PBI 379 Neuropsychology
- PBI 380 Psychopharmacology
- PBI 388 Brain & Behaviour II

#### Cognition & Motivation (at least 1)
- PSY 203 Cognition & Motivation Sports
- PSY 217 Motivation & Emotion
- PSY 302 Perception
- PCS 307 Cognitive Processes
- PSY 370 Learning & Memory
- PSY 386 Psychology of Language

#### Development (at least 1)
- PSY 266 Adult Aging
- PSY 290 Adolescence
- PSY 333 Exceptional Child Dev.
- PSY 348 Social Development*

#### Social (at least 1)
- PSY 204 Social Psychology of Sports
- PSY 214 Community Psychology*
- PSY 219 Psychology of Gender
- PSY 246 Social Psychology II
- PSY 293 Multicultural Psychology
- PSY 348 Social Development*

#### Applications (at least 4)
- PSY 210 Psychology of the Couple
- PSY 214 Community Psychology*
- PSY 222 Group Therapy
- PBI 275 Health Psychology I
- PBI 276 Health Psychology II
- PSY 277 Physical & Mental Health
- PSY 292 Psychology of Music & Fine Arts
- PSY 298 Zen and the Brain
- PSY 303 Positive Psychology
- PSY 306 Adv. Theories Personality
- PSY 322 Dance/Movement Therapy
- PBI 327 Psychology of Nutrition
- PSY 330 Psychology and Ethics
- PSY 336 Interviewing
- PSY 337 Crisis Intervention
- PSY 339 Madness & Film: Representations of Mental Illness in Current Psychiatry
- PSY 389 Humanitarian Psychology: Mental Health, Psychosocial Support and Coordination in Humanitarian Settings
- PBI 361 Psychology of Sexuality
- PBI 399 Psychology of Drug Addiction

* Courses contribute to only one block

#### Honours Option

**Typical First Year**

**From CEGEP**
- **Fall:** PSY 206, PMA 260, PSY 235, PBI 288, Elective or Biology block
- **Winter:** PCS 207, PSY 301 or PSY 311, PSY 213, PMA 360, Elective or Biology block

**From High School**
- **Fall:** PSY 101, PSY 102, Elective or Humanities block, Elective or Biology block
- **Winter:** PSY 206, PBI 288, PCS 207, Elective or Humanities block, Elective or Biology block

**Typical Second Year**

**From CEGEP**
- **Fall:** PSY 245, Applications block, Development block, Cognition or Physiology block, Elective or Humanities block
- **Winter:** PMA 353, Social block, Cognition or Physiology block, PSY 336 or Applications block, Elective

**From High School**
- **Fall:** PMA 260, PSY 301 or PSY 311, PSY 235, PSY 245, Elective
- **Winter:** PSY 213, PMA 360, Development block, Cognition or Physiology block, Elective

**Typical Third Year**

**From CEGEP**
- **Fall:** PSY 342, Applications block, Elective or Humanities block, plus 2 Electives
- **Winter:** Applications block, 4 Electives
From High School

Fall: Cognition or Physiology block, Social block, Applications block, Elective block, plus 3 Electives

Winter: PMA 353, PSY 336 or Applications block, plus 3 Electives

Typical Fourth Year

From High School

Fall: PSY 342, Applications block, plus 3 Electives

Winter: Applications block, 4 Electives

B.Sc. Psychology - Neuroscience

Complete the Core, Humanities, Cognitive Science, and Natural Science blocks (81 credits)

Core

PSY 101 Introduction to Psy. I
PSY 102 Introduction to Psy. II
CHM/L 191 General Chemistry I
CHM/L 192 General Chemistry II
PHY/L 193 Physics I
PHY/L 194 Physics II
BIO/L 196 Intro. Cell & Mol. Biology
MAT 198 Calculus I for Life Sci.
MAT 199 Calculus II for Life Sci.
BIO 201 Cellular Molecular Bio.
PCS 207 Cognition
PSY 206 Personality
BIO/L 208 Genetics

Plus, at least one of:

PSY 301 Abnormal Psychology
PSY 311 Psychopathology

Humanities (at least 1)

LIB 210 Eros, Love & Desire
LIB 212 In Search of Justice
LIB 217 Towards Spatial Justice
RSC 100 Middle Eastern Matrix: Religions of the West
RSC 101 Asian Origins: Religions of the East
RSC 148 Psychology of Religion
RSC 204 Women in Religion
CLA 100 Food, Comm & Culture
CLA 102 Ancient Greece: Hist/Cult.
CLA 112 Ancient Greek Mythology
CLA 250 Sex in the Ancient World

Cognitive Science (at least 1)

PSY 302 Perception
PCS 307 Cognitive Processes
PSY 370 Learning & Memory
PSY 386 Psychology of Language

Natural Science (at least 3)

CHM 111 Organic Chemistry
BIO/L 205 Diversity of Life
BCH 210 General Biochemistry
BCH 312 Lipids & Biomembranes
BCH 313 Metabolism
BIO 336 Animal Physiology I
BIO/L 337 Animal Physiology II
BIO 359 Human Genetics
BCH 382 Biochem. & Toxicology
BCH 411 Molecular Biology

Honours Option

(21 additional credits)

PSY 313 Adv. Research Methods or PSY 462 Qualitative Methods
PSY 443 History of Psy. Seminar
PMA 353 Psychometrics
PSY 498 Honours Seminar
PSY 499 Honours Thesis (6 credits)
PMA 460 Multivariate Statistics

The Honours adds 21 credits, for a total of 102 credits. To qualify for the Honours option, students must have a cumulative average of at least 80% in their major courses. Students must also achieve a combined average of at least 75% between PSY 313 and PMA 360 or at least a 75% between PSY 462 (Qualitative Methods) and PMA 360.

. Potential Honours students are advised to take PMA 353 before their final year. (See page 232 for additional details)

Typical First Year

From CEGEP (Science)

Fall: BIO 201, PSY 206, PMA 260, Elective
Winter: BIO 208, BIL 208, PSY 213, PSY 301 or PSY 311, Natural Science block or Elective

From CEGEP (Science)

Fall: BIO 201, PSY 206, PMA 260, Elective
Winter: BIO 208, BIL 208, PSY 213, PSY 301 or PSY 311, Natural Science block or Elective
List of Courses

The following list includes courses which are normally offered by the department each year, as well as courses which are offered on a rotating basis. Those courses which are offered only irregularly are listed separately at the end of this section.

**PSY 101 Introduction to Psychology I: Basic Processes 3-3-0**
An introduction to the functioning and development of the basic cognitive processes: perception, learning, memory, thinking, intelligence and consciousness. Approaches and methods will also be discussed.

**PSY 102 Introduction to Psychology II: Human Interactions 3-3-0**
An introduction to motivation, emotion, and personality as factors in human functioning. Approaches, methodology, social psychology and abnormal psychology are also discussed.

**PSY 113 Research Methods I 3-2-2**
Scientific bases of psychological theory; experimental and non-experimental research methods; data analysis; report writing; critical analysis of published articles. Class projects are conducted, statistically analyzed, and written up

_Students who have taken PSY 213 (Research Methods) may not take this course for credit._
Prerequisites: PMA 160, PSY 101, PSY 102

**PMA 113 Data Collection and Analysis 3-3-0**
The scientific study of psychology through various research methods, including quantitative and qualitative perspectives, will be introduced. Hypothesis formulation and basic statistical analysis techniques will be discussed and put into practice, including measures of central tendency and variability, the normal distribution, confidence intervals, and hypothesis testing. Students who are currently taking or have received credit for any other statistics course at BU are not eligible to enroll in this course.

_Pre or Corequisite: PSY 101

**PSY 203 Cognition and Motivation in Sport: Performance Enhancement 3-3-0**
A systematic review of how individual factors influence and optimize sports performance. Major topics include introduction and research methods, personality, mood, motivation, learning and cognition. Both theory and application will be emphasized.

_Students who have taken PSY 208 (Sports Psychology) cannot take this course for credit._
Prerequisite: PSY 101 or PSY 102
Corequisite: PSY 101 or PSY 102

**PSY 204 The Social Psychology of Sport and Exercise 3-3-0**
A systematic review of the social aspects and effects of sport and exercise. Major topics include introduction and research methods, audience effects, leadership, team cohesion, aggression in athletes and fans, bias in judging, and benefits and costs of sports and exercise participation.

Prerequisite: PSY 101 or PSY 102
Corequisite: PSY 101 or PSY 102

**PSY 206 Personality 3-3-0**
An examination of theories of personality based on the clinical approach, as illustrated by psychoanalytic and humanistic theories; and based on the psychometric and experimental approaches, as illustrated by trait and learning theories.

_Students who have taken PSY 107 (Personality) or PSY 207 (Personality II) may not take this course for credit._
Corequisite: PSY 101 or PSY 102

**PSY 210 Psychology of the Couple 3-3-0**
This course is a survey of research on the psychology of the couple. Topics treated include: psychology of the female and male; factors in partner choice; bonding and love; commitment and contract; stages of coupling; divorce and recommitment. Psychodynamic, behavioural and systemic approaches to couple therapy will be examined.

Prerequisites: PSY 101 and PSY 102

**PSY 213 Research Methods 3-2-2**
Scientific bases of psychological theory; experimental and non-experimental research methods; data analysis; report writing; critical analysis of published articles. Class projects are conducted, statistically analyzed, and written up.

_Students who have taken PSY 113 (Research Methods I) cannot take this course for credit._
Prerequisite: PMA 260 or Business (BMA 140 or BMA 141) or Physics (PHY 101) equivalent
Corequisite: PMA 360

**PSY 214 Community Psychology 3-3-0**
Community Psychology is the study and application of psychological solutions to community-based problems. Through an analysis of the reciprocal relationship between person and environment (clubs, churches, schools, neighborhood, larger culture) Community Psychology emphasizes action and interventions whose aim is to prevent problems in living, promote social-psychological competencies and improve people’s well-being. This course introduces students to the ways in which research and science intersect with the practical aspects of working successfully with people in their communities. Topics include the background and history of the field, community research methods, empowerment of disenfranchised groups, social support, cultural diversity, prevention, program evaluation and development of community intervention strategies.

Prerequisites: PSY 101 and PSY 102

**PBI 217 Motivation and Emotion 3-3-0**
An exploration of the underlying causes of human behavior. Topics include hunger and eating, sex and love, aggression, drug use/abuse and higher-level behaviors (e.g. creativity, attaining peak performance, goal setting, self-regulation). The role of emotions in guiding behavior will also be addressed.

Prerequisite: PSY 101

**PSY 219 Psychology of Gender 3-3-0**
In this course, gender diversity, gender stereotypes and biases are exposed. The rape myths are debunked and sexual orientation is demystified. Gender comparisons in cognitive abilities and in social and personality characteristics are discussed. Other topics of interest include love relationships, sexuality, sexual harassment and assault, gender-based violence, as well as prevalence of specific mental health problems across gender. This course is a must for those who enjoy class discussions.

_Students who have taken PSY 109 (Psychology of Women) cannot take this course for credit._
Prerequisites: PSY 101 or PSY 102
Corequisite: PSY 101 or PSY 102

**PSY 222 Group Dynamics 3-3-0**
This course introduces students to the principles and practices of group behavior, emphasizing dynamic processes (norms, roles, relations, development, social influence) which form a basis for group therapy as a branch of psychotherapy. Background, founders and key influences, contexts of use, techniques, methodology and current trends in group therapy will be discussed.

Prerequisites: PSY 101 and PSY 102

**PSY 235 Child Development: Infancy to Middle Childhood 3-3-0**
The foundations of child development. Topics include basic genetics, development of learning and cognition, socioemotional development, moral development and the classic theories of developmental psychology.

_Students who have taken PSY 236 or PSY 237 cannot take this course._
Prerequisites: PSY 101 or PSY 102

**PBI 241 Evolutionary Psychology 3-3-0**
Evolutionary Psychology is the study of behavior founded within the framework of Darwin’s Theory of Evolution through Natural Selection. The purpose of this course is to introduce the students to the principles of Evolutionary Psychology and to investigate the adaptive origins of many common behaviors such as cooperation, mating strategies, parenting, aggression and dominance.

_Students who have taken PBI 141 (Evolutionary Psychology) cannot take this course for credit._
Prerequisite: PSY 101

**PSY 245 Fundamentals of Social Psychology 3-3-0**
This course introduces students to the history, research techniques, and fundamental principles of the field of social psychology, including the basics of social affect, social cognition, and social behaviour. Research on topics such as self and social identity, social perception, attitudes, social influence, and cultural psychology are discussed with an emphasis on learning the basic principles of the field.

Prerequisite: PSY 101 or PSY 102
PSY 246 Applications of Social Psychology 3-3-0
This course is a survey of applied topics in social psychology, including the application of social psychological principles to the understanding of attraction and close relationships, aggression, altruism, prejudice, morality, conflict, and political discourse
Prerequisite: PSY 245

PSY 247 Lessons from the Marvel Universe 3-3-0
In this class we examine the psychology of storytelling in the Marvel universe and what it tells us about our own untaught superpowers. We explore issues of morality, identity, leadership, and learning by exploring how we can connect with literary and psychological theory in a close reading of the storytelling in the Marvel Universe. We will take a deep dive into characters such as Captain Marvel, Loki, Wanda, Black Panther, and Black Widow. Evaluation will be on collaborative participation, writing, and creative assignments
Cross Listed with ENG 237

PMA 260 Psychological Statistics 3-2-1
Basic descriptive and inferential statistics developed from a conceptual perspective. Topics include measures of central tendency and variability, normal distribution, probability, confidence intervals, sampling distributions, hypothesis testing, power analysis, z-tests, t-tests and chi-square.
Students who have taken PMA 160 (Psychological Statistics I) cannot take this course for credit
Students who have taken PHY 101 may not take this course for credit
Students who have taken BMA 140 or BMA 141 do not need to take this course as well

PSY 266 Adult Development and Aging 3-3-0
An examination of psychological development during adulthood and old age. Research findings on age related changes in memory, health issues, adjustment, coping styles, and stress will be covered. Case studies will be used to explore various applications in society.
Prerequisite: PSY 101 or PSY 102
Corequisite: PSY 101 or PSY 102

PBI 275 Health Psychology I 3-3-0
Introduction to health psychology and the biopsychosocial model of health. Topics include: methods of health research, obtaining care and following health advice, stress, pain, behavioural factors in health, alternative medicine, mental illness, global health issues.
Prerequisite: PSY 101. It is highly recommended that students also take PSY 102

PBI 276 Health Psychology II 3-3-0
Selected topics in health psychology: cardiovascular disease, cancer, chronic and terminal illness, preventing injuries, smoking tobacco, using alcohol and other drugs, diet and weight control, exercising, future projects.
Prerequisite: PSY 101. It is highly recommended that students also take PSY 102

PSY 277 Physical and Mental Health 3-3-0
This course will examine the mutual interaction between physical and mental health, using the biopsychosocial model as a conceptual framework. For example, depression as a factor in cardiovascular disease (and vice-versa), or the effect of diet upon behaviour disorders, will be explored with detailed attention to genetic, developmental, personality, lifestyle and social factors. Therapeutic interventions will also be covered, for example to compare the success of behavioural versus medical approaches in the treatment of depression. The course will include lectures and seminar presentations.
Prerequisite: PSY 101. It is highly recommended that students also take PSY 102

PBI 288 Brain and Behavior I 3-3-0
An introduction to physiological psychology and to the complex relationship between brain activity and human behavior. Topics include structure and function of the brain, the neuron, neurotransmitters, neuroscience research methods and the physiology of the sensory and motor systems.
Students who have taken PBI 128 (Physiological Bases of Behavior I) may not take this course for credit
Prerequisite: PSY 101

PSY 290 Adolescence 3-3-0
An examination of developmental issues in the adolescent period and related clinical phenomena: environmental influences (family, school, peers) and intra personal concerns (identity, sexuality, moral development); clinical conditions such as depression (suicide), eating disorders, and delinquency.
Prerequisites: PSY 101 and PSY 102

PSY 292 Psychology of Music and the Fine Arts 3-3-0
This is an introductory course to the use of the arts, broadly defined, in clinical settings. Specifically, this course will explore the use of music and fine arts as clinical tools to improve wellbeing with adults and children, in a variety of settings (schools, hospitals, rehabilitation facilities, retirement homes, etc.). This introduction to the psychology of music and fine arts will explore key areas such as music and language, music/fine arts and emotion, as well as the applied psychology of music and fine arts in a range of social, health, educational and therapeutic contexts. The big questions in the field will be considered; such as the role of music and fine arts in our evolutionary history, whether some of us are ‘born musical/artistic’ and others are not, whether music and arts can make us smarter, or can encourage us to behave aggressively.
Prerequisites: PSY 101 and PSY 102

PSY 293 Multicultural Psychology 3-3-0
The place of culture in the evolution of psychology. Cultural similarities and differences in behaviour, thoughts, emotions, attitudes, motivations, mental and physical health, etc. Understanding that psychological principles can range from being universal to culture-specific.
Prerequisites: PSY 101 and PSY 102

PSY 298 Zen and the Brain 3-3-0
The interest in Eastern philosophy and religion in the West is not a new phenomenon, but careful scientific examination of the techniques linked to some Eastern traditions, such as meditation and mindfulness, as well as their increasing use in psychotherapy, is relatively new. In this course we will introduce the basis of Buddhist and Hindu thought and practice, and review critically the available literature on the neurophysiological and neuropsychological effects of different forms of meditation.
Pre or Corequisites: PSY 101 or PSY 102 or being admitted to Mindfulness & Contemplative Studies Minor

PSY 301 Abnormal Psychology 3-3-0
An introduction to the experimental approaches, diagnoses, classifications, viewpoints, and the therapeutic techniques used in abnormal psychology. The interaction between genetic predisposition and environmental stressors in the etiology of abnormal behavior will be emphasized. Various anxiety disorders (e.g., specific phobias), obsessive-compulsive and related disorders (e.g., OCD), and psychotic disorders (e.g., schizophrenia), and personality disorders (e.g., borderline personality disorder) will be discussed.
Prerequisites: PSY 101, PSY 102 and PSY 206
Students who have taken PSY 341 (Abnormal Psychology) may not take this course for credit.

PSY 302 Perception 3-3-0
Based on a rich array of perceptual demonstrations, this course provides a comprehensive overview of how our senses, mostly vision and audition, allow us to know and understand the world. Topics include physiology of the sensory systems, perceiving objects and faces, color, depth and motion perception, visual illusions, music perception, perceptual illusions and perceptual impairments.
Prerequisites: PSY 101 and PBI 288

PSY 303 Positive Psychology 3-3-0
Traditionally, when we think of psychology, and especially of clinical psychology, we think of mental illness and psychopathology. However, researchers and clinicians alike have recently been also interested in studying variables that make individuals flourish and thrive. What makes us happy? What roles do hope and optimism play in our overall well-being? Can keeping a gratitude journal have an impact on our outlook on life? All of these variables fall within the realm of positive psychology, which can be described as the study of factors that make people lead fulfilling lives. This class will present theory behind variables that are comprised within positive psychology, while providing a strong clinical and experiential component.
Prerequisites: PSY 101 and PSY 102

PCS 305 Cognition 3-3-0
Cognitive processes: language, memory, concepts, heuristics, the nature of thought, reasoning, problem solving, creativity, and anomalous beliefs.
Students who have taken PCS 205 (Cognitive Psychology) cannot take this course for credit
Prerequisites: PSY 101 and PSY 102 and PBI 288
PSY 306  Advanced Theories of Personality  3-3-0
An advanced course focused on deepening knowledge of core aspects of personality theories. Topics will focus on the clinical aspects and the social implications stemming from personality theories. In addition, the role of statistical methodology (e.g., factor analysis) will be explored in terms of how personality dimensions are established.
Prerequisites: PST 101 and PSY 102, PSY 206, PSY 213

PCS 309  Introduction to Python for Researchers  3-3-0
This course will teach the fundamentals of programming using the Python language in the context of conducting research in psychology, with an emphasis on cognitive psychology and cognitive neuroscience applications. The course will first cover how to break complex tasks into discrete logical steps, then address how to convert large raw data sets into smaller summary data sets ready for traditional statistical analysis. Students will also learn to use a primarily point-and-click programming environment designed around Python to quickly design basic experiments for research in psychology.
Prerequisites: PSY 213 and PMA 260 or the Business (BMA 140 or BMA 141) or Physics (PHY 101) equivalents for PMA 260

PSY 311  Psychopathology  3-3-0
This course is a continuation of PSY301. Topics covered include: mood, dissociative, somatic and eating trauma and stress-related disorders, as well as sexual dysfunctions and disorders of childhood and adolescence. Students who have taken PSY 341F (Abnormal Psychology) may not take this course for credit
Prerequisites: PSY 101, PSY 102 and PSY 206

PSY 313  Advanced Research Methods  3-2-2
Research methodology in the study of human behaviour. Formulation of the research proposal; presentation and discussion of results in APA format reports; factorial and correlational designs; computers in data analysis. Class and individual projects are conducted. Students who have taken PSY 215 (Research Methods II) cannot take this course for credit
Prerequisites: PSY 213 and PMA 360

PSY 322  Introduction to Dance/Movement Therapy  3-3-0
Dance/Movement Therapy (DMT) is an approach which uses dance and movement to deepen self-awareness and comfort with oneself, to facilitate fulfilling relationships, to make the unconscious conscious, as well as to alleviate mental health problems. Unlike mainstream talk therapies, DMT uses the entire body to approach the client primarily on a non-verbal and creative level. The course will be partly theoretical and partly experiential with about 50-50 split. A typical class would include a mini-lecture, discussion, and dance/movement component. The topics will range from historical perspectives and theoretical underpinning of DMT, through discussion and practice of DMT methods, to clinical interventions. Dance and movement experience is an asset but is not required. All bodies with diverse movement repertoires are welcome!
Pre or Corequisite: PSY 101 or PSY 102

PSY 325  Independent Studies I  3-0-0
Theoretical or experimental work conducted under the direct supervision of two faculty members. The project and grading scheme needs to be approved beforehand by the Psychology Department.
Prerequisites: PST 101 and PSY 206

PSY 326  Independent Studies II  3-0-0
Theoretical or experimental work conducted under the direct supervision of two faculty members. The project and grading scheme needs to be approved beforehand by the Psychology Department.
Prerequisites: PST 101 and PSY 102

PBI 327  Psychology of Nutrition  3-3-0
This course explores the many physiological, psychological and sociocultural factors that influence children and adults’ food choice and preferences. The activity of eating is understood in its relation to physical and psychological health, body size and dissatisfaction, dieting, obesity, anorexia nervosa and bulimia nervosa. Students who have taken PBI 227 (Psychology of Nutrition) cannot take this course for credit
Prerequisite: PSY 101. It is highly recommended that students also take PSY 102

PSY 333  Psychology of Exceptional Development  3-3-0
A survey of various kinds of exceptionality in children, including intellectual disabilities, giftedness, speech and language differences, learning disabilities, hearing and vision impairments, behaviour disorders, health problems, and developmental disabilities. Students who have taken PSY 233 (Psy. of Exceptional Children) cannot take this course for credit
Prerequisite: PST 101 and PSY 102

PSY 336  Interviewing  3-3-0
Interviewing techniques are explored by surveying various theories of change (psychoanalytic, existential, feminist, person-centered, cognitive-behavioral, reality, and postmodern). Emphasis is placed on the acquisition of both theoretical knowledge and practical skills that have direct relevance in applied settings. Class discussions, role-playing, and use of video clips are pedagogical tools enjoyed by students. Students who have taken PSY 230 (Interviewing) cannot take this course for credit
Prerequisites: PSY 101, PSY 102 and PSY 206
Co-requisite PMA 353 or permission of the instructor

PSY 337  Crisis Intervention  3-3-0
Engaging class discussions, guest speakers, role plays, videos and practice-based lectures provide a framework for understanding what constitutes a crisis, various types of crises and key elements of crisis assessment and intervention that are used in a variety of crisis situations. Specific crises examined include crises of lethality, conjugal violence, sexual assault, crises of loss and human-made disasters. Students who have taken PSY 231 (Crisis Intervention) cannot take this course for credit
Prerequisites: PSY 101, PSY 102 and PSY 206

PSY 339  Madness & Film  3-3-0
While cinematic representations may conform to past or current psychiatric nosology, specific and unique portraits of mental disorders have also been associated with the film discourse. Film portrayals of psychopathology can then be based on scientific definitions but also in other perspectives such as historical interpretations, cultural beliefs, reassessments of character, creative malady views, big screen traditions, public appeal, marketing, authorship interpretations, or revisions and critiques vis-à-vis psychiatric nosology or societal control. This course will explore the visions and conceptualizations of behaviours considered to be within the realm of madness in film and within the spectrum of mental illness in the psychiatric field.
Prerequisites: PSY 301 or PSY 311 or ENG 287 or ENG 291 or ENG 282 or PHI 345 Students in Psychology, Film and Philosophy will be prioritized

PSY 342  History of Psychology  3-3-0
An examination of the early conceptions of human nature that influenced psychology’s development. The course is presented in two parts, the first examining the nature of history and the history of science. The second part explores the conception of humanity in ancient texts from Homer, Sophocles, Plato, Aristotle and Augustine.
Prerequisites: PSY 101 and PSY 102. Open to those students entering their final undergraduate year

PSY 345  Family Therapy  3-3-0
A critical survey of major theories of family dynamics and family therapy, including psychoanalytic; existential, systemic, structural, and strategic approaches. The course also aims to further the student’s understanding of his or her own family system through individual and group exercises.
Prerequisites: PSY 101 and PSY 102

PSY 348  Social Development  3-3-0
An examination of the development of social relationships from childhood to adolescence, with a particular focus on peer relationships. This includes an examination of sociometrics, social-cognitive and emotional processes, bullying, morality, friendships and romantic relationships.
Pre or Corequisites: PSY 101 and PSY 102

PMA 353  Psychometrics and Psychological Testing  3-3-0
The course covers the development process and psychometric properties of typical psychological measurement tools, including norms, reliability, validity, and factor analysis. Critical examination of these properties for selected instruments and different research scenarios will be involved, and students will practice developing their own measurement tool.
Students who have taken PMA 223 (Psychometrics) or PMA 224 (Issues in Psychological Testing) cannot take this course for credit
Prerequisites: PSM 213 and PMA 260, or the Business (BMA 140 or BMA 141) or Physics (PHY 101) equivalents for PMA 260
PMA 360 Advanced Psychological Statistics 3-3-0
Advanced inferential statistics developed from a conceptual perspective. Topics include one and two-way analysis of variance, repeated measures ANOVA, fixed and random designs, post-hoc and a priori tests. Explorations will also include correlation, regression and their relationship to ANOVA and use of jamovi and/or SPSS in analysis.
Students who have taken PMA 161 (Psychological Statistics I) cannot take this course for credit. Pre-requisite: PMA 260, or the Business (BMA 140 or BMA 141) or Physics (PHY 101) equivalent. Corequisite: PBI 213.

PBI 361 The Psychology of Sexuality 3-3-0
Various aspects of human sexuality from a psychological perspective. Includes the following topics: sexuality in childhood, adolescence, and early through late adulthood; sex differences; androgyny; transsexualism; sexual dysfunction and sex therapy; sexuality in the chronically ill and disabled; homosexuality and bisexuality; historical and cross-cultural sexual attitudes and practices. Pre-requisite: PSY 101. It is highly recommended that students also take PSY 102.

PSY 370 Learning and Memory 3-3-0
A seminar course examining theories of learning and memory. The seminars follow a historical sequence examining changes in our understanding of learning and memory. Topics include classical conditioning, behavioural, cognitive and gestalt approaches to learning and memory. Students who have taken PSY 270 (Learning and Memory) cannot take this course for credit. Pre-requisite: PSY 101 and PSY 102.

PBI 379 Neuropsychology 3-3-0
Neuropsychology is the study of the relationship between brain structures and behaviour. In this course we will explore the neuroanatomical correlates of both normal and abnormal behaviors in humans. Among the topics to be discussed are the behavioural sequelae of head injury, mood disorders associated with regional trauma and epilepsy, sex differences in cerebral organization, cerebral asymmetries, language and aphasia and the various disorders of perception. Depending on the interests of the students, special topics include dyslexia, alexithymia, Alzheimer’s disease, alcoholism and schizophrenia. Students who have taken PBI 279 or BHS 279 (Neuropsychology) may not take this course for credit. Pre-requisite: PSY 101, PBI 288 or permission of the instructor.

PBI 380 Psychopharmacology 3-3-0
This course is designed to introduce students in psychology and the natural sciences to the field of psychopharmacology. Emphasis will be placed on the relationships between psychoactive drugs, their mechanisms of action in the nervous system, and human behaviour. This course will offer an introduction to the principles of pharmacokinetics and pharmacodynamics; an advanced discussion of major neurotransmitter systems in the human nervous system; and an overview of the cognitive, emotional, and behavioural effects of specific classes of drugs. Drug classes considered will primarily be those prescribed for therapeutic purposes (e.g., antidepressants, sedatives, antipsychotics, stimulants, cannabinoids). Students who have taken PBI 280 or BIO 280 (Psychopharmacology) may not take this course for credit. Pre-requisite: PSY 101, PBI 288 or permission of the instructor.

PBI 388 Brain and Behavior II 3-3-0
This course is a continuation of PBI 288. The physiological bases of motivated behavior (sleep, sex, hunger and thirst), emotions, learning/memory and language. The focus is on normal physiology but some aspects of abnormal physiology (e.g. amnesia, anxiety, schizophrenia) will be addressed. Students who have taken PBI 228 (Physiological Bases of Behavior II) cannot take this course for credit. Pre-requisite: PBI 288 or permission of the instructor.

PSY 389 Humanitarian Psychology 3-3-0
The impacts of emergencies may be acute in the short term but can also undermine the long-term mental health and well-being of vulnerableised populations. Therefore, one priority is to protect and improve people’s mental health and psychosocial well-being and to prevent or treat mental disorder, which requires coordinated action among government, community, and humanitarian actors. In this course, students learn mental health, psychosocial support and coordination strategies in humanitarian settings. For instance, how to organize psychological care and support building while advocating for the survival, well-being and preparedness of vulnerableised populations. Key elements of mental-health assessment, intervention, preparedness and responses during acute phases and early reconstruction are discussed. Psychological and psychiatric interventions for problems such as sexual assault, loss, PTSD, human-made disaster and protracted crisis are introduced. Pre-requisites: Either PSY 214 or PBI 380 and one of PBI 275 or PSY 301 or PSY 311 or PSY 337.

PBI 398 Neuroscience Seminar 3-3-0
This course will be taught as a series of student-led seminars covering a wide range of topics including molecular, cellular, behavioral, cognitive and clinical neuroscience, as well as new developments in psychopharmacology and neuroendocrinology. Course content will vary from year to year to encompass the most recent developments in the field of neuroscience. Pre-requisites: PSY 101, PSY 102, and PBI 288.

PBI 399 Psychology of Drug Addiction 3-3-0
Despite decades of intense research, development of new therapeutic approaches, and public advertising campaigns (e.g. “JUST SAY NO”), the problem of drug abuse does not want to go away (and in fact is on the rise in the selected demographic groups such as women, adolescents and children). During this course we will examine different classes of addictive substances; discuss various neurobiological, psychological and sociocultural factors implicated in the initiation and development of dependence; as well as evaluate critically the available therapies and interventions for treatment of drug addiction. Pre or Co-requisites: PSY 101, PSY 102 and PBI 288.

PSY 406 Current Topics In Clinical Treatment Models 3-3-0
This course applies sound scientific methodology in evaluating current clinical treatment models for specific mental disorders. Students will critically examine outcome data from a variety of clinical diagnoses as outlined in the Diagnostic Statistical Manual 5 (DSM 5). Pre-requisite: PSY 301 or PSY 311. Pre or Co-requisite: PMA 333.

PSY 409 Advanced Topics in Psychology 3-3-0
This is an advanced seminar that takes an in depth look at some of the key areas of inquiry in Psychology. Topics and instructors will vary, but courses might cover issues such as morality, clinical issues, neuropsychology, community development, and media. Students will engage in reading primary sources, in depth discussions, and critical thinking about the topic presented. Pre-requisites: PSY 101 and PSY 102. PSY 213 and permission of instructor.

PSY 410 Psychology of Death and Dying 3-3-0
Death is a human affair, not simply a biological one. Adopting an historical, existential-humanistic psychology perspective, the role of death and its impact on our lives will be examined. Texts from the ancient world will be read along with those written by psychologists (Fechner, James, Freud, Jung, Fromm, Erikson, Frankl, May, Rogers, Skinner, Kübler-Ross and Becker). Integrated throughout the course are contemporary texts drawn from diaries and books by authors who have recorded their experiences with death and dying. Pre-requisites: PSY 206 and PSY 336.

PSY 420 Contemplative Practicum 3-0-3
Mindfulness and contemplation are essential for intellectual, emotional and spiritual growth and insight. They facilitate deepening of self-knowledge and understanding of the world around us. In this course, students will get a chance to examine their selves, their minds and their surroundings from the first-person perspective. Each student, in consultation with the course instructor, will select a specific method of self-inquiry (e.g., meditation training, pilgrimage, artistic process) and devote it to approximately 50-70 hours of practice. The students will be required to keep a detailed diary of their experience describing the process, providing personal insights, comparative analysis, implications and impact of the experience on their lifestyle and philosophy. In addition, students will be encouraged to share their experiences with others during class discussions. Pre-requisite: Being admitted to Mindfulness & Contemplative Studies Minor or permission of instructor.

PSY 441 Advanced Applied Seminar 3-1-2
As a link between Interviewing (PSY 336) and Applied Practicum (PSY 442), this course is taught as a series of student-led seminars on various clinical topics. Vigorous class debates, meaningful exchanges with guest speakers (from the community at large) and the opportunity to learn and apply basic interviewing skills with video tape feedback are all enriching aspects of this course. Students enrolled in a major program are welcome, providing that they have the prerequisites. Pre-requisites: PSY 101, PSY 102, PSY 206, PMA 333 and at least 75% in PSY 336.
PSY 442  Practicum  3-0-3
Aimed at introducing students to psychology’s applied field while sensitizing them to its stakes, this course is completely practical and offers experiential learning opportunities. Students spend 6hrs/week under close supervision in one of a number of applied settings. Field placements are possible in hospital and school settings, various community organizations, senior citizens’ homes, life skills development centres, women’s centre, etc., and are assigned in accordance with students’ competencies and interests.
Prerequisite: PSY 441

PSY 443  History of Psychology Seminar  3-3-0
A seminar course that examines the effects the scientific revolution on our conception of mind and psychology. The seminars are based on the writings of the Rationalists (Descartes, Spinoza, Leibniz), Empiricists (Locke, Berkeley, Hume) and those that reflect the emergence of Evolutionary thinking and its influences on our conceptions of mind/brain, consciousness, and the nature of human science.
Students who have taken PSY 343 (History of Psychology II) cannot take this course for credit
Prerequisite: PSY 342

PMA 460  Multivariate Statistics  3-3-0
An examination of multivariate statistical approaches to research. Topics include multiple correlation, regression, partial & semipartial analysis, stepwise regression, statistical control, hierarchical modeling, multiple regression with categorical and continuous variables, analysis of covariance, and multivariate analysis of variance.
Students who have taken PMA 261 (Multivariate Statistics) cannot take this course for credit
Prerequisite: PMA 360

PSY 462  Qualitative Methods in Psychology  3-3-0
This course provides students a conceptual understanding of qualitative research and their application in psychology. The course introduces major concepts and terms, and different qualitative methods including case studies, in-depth interview, participant observation, life histories (narratives) and ethnographies. It focuses on developing a theoretical understanding of qualitative methodology.
Pre or Corequisites: PSY 101 and PSY 102

PSY 477  Personality, Health and Well-being  3-3-0
An advanced seminar that undertakes a critical analysis of historical and contemporary theoretical perspectives on the role personality plays in physical and psychological well-being. General topics may include the contribution of personality to physical health and illness, the role of personality in stress and coping, the links among personality, health, and well-being across the adult lifespan, the role of personality in health and well-being in the context of personal relationships, and issues related to the assessment of personality and well-being.
Prerequisite: PBI 275 or PBI 276

PSY 498  Honours Seminar  3-3-0
This seminar aims at exploring cutting-edge issues in Psychological Science. Selected topics from these areas are presented and critically discussed. The course will also guide students as they get their Honours Thesis under way and address practical issues such as applications to graduate school, scholarship applications, GREs and career planning.
Students who have taken PSY 449 (Honours Seminar: Advanced Topics) cannot take this course for credit
Prerequisite: Only open to Honours students (having already completed PSY 313 and PMA 360 with an average of 75 % or above)
Co-requisite: PSY 499f

PSY 499F  Honours Thesis  6-0-0
Under the guidance of two faculty advisors, the student will formulate a proposal for original research involving the collection of data, undertake the research, and report it both as a public talk and in the form of a thesis conforming to the publication style of the American Psychological Association.
Students who have taken PSY 450 (Dissertation) cannot take this course for credit
Prerequisite: Only open to Honours students (having already completed PSY 313 and PMA 360 with an average of 75 % or above)
Co-requisite: PSY 498

PMA 460 is an additional prerequisite for projects involving multivariate research.

Cognate Courses
These courses may count for Psychology credit.

- BHR 221  Organizational Behavior  3-3-0
- EDU 203  Educational Psychology  3-3-0
- PHI 244  Philosophy of Mind  3-3-0
- RSC 148  Psychology of Religion  3-3-0

PSY 285  Psychology of Reading and Reading Disability  3-3-0
The aim of this course is to consider the psychological processes involved when we read. In particular, the skills that are acquired, the mechanisms involved, and the abilities that are essential will be examined. Why some people fail to acquire reading skills will also be examined. Answers to this question will focus on theoretical approaches to reading disability, and to the question of why some methods of remediation are successful.
Prerequisites: PSY 101 and PST 102

PSY 309  Industrial and Organizational Psychology  3-3-0
This course introduces students to theories and applications of psychology to human resource concerns in organizations. Topics include: Personnel recruitment, selection, training and performance appraisal; motivation; work attitudes; leadership; group behaviour; and other special topics (e.g., work related stress, applied ethics, and organizational conflict). Students who have taken BHR 221 cannot take this course for credit
Prerequisites: PSY 101 and PST 102

PBI 320  Physiology and Pharmacology of Aging  3-3-0
The major physiological systems will be reviewed, with emphasis on how these systems change during the aging process and how these changes affect the individual’s everyday functioning. Topics will include the cardiovascular system; respiratory system; metabolic regulation, digestion and absorption; and electrolyte and mineralocorticoid regulation. A review of basic pharmacological principles and mechanisms of action will follow this. Finally, we will discuss how the aging process interacts with various types of medications most frequently prescribed to elderly people, and some common idiosyncratic reactions seen in the elderly. Also, the special precautions which must be observed in prescribing and administering drugs to the elderly will be outlined.
Prerequisite: PSY 101. It is highly recommended that students also take PSY 102

PSY 330  Psychology and Ethics  3-3-0
A wonderful way to learn how to think ethically in several areas of psychology. Students learn about the importance of fundamental ethical principles, values, theoretical and practical models of ethical decision-making and legal considerations, while engaged in the comparison of relevant ethics codes (with particular emphasis on the CPA code of ethics). Specialized topics include confidentiality, multiple relationships, the ethics of teaching, the ethics of counselling, the ethics of assessment, research ethics, and ethics in forensic settings. Class discussions are part and parcel of this course.
Prerequisites: PSY 101 and PST 102

PSY 350  Environmental Psychology  3-3-0
Influence of the physical and cultural environment on behaviour, including factors such as heat, noise, crowding, traffic, buildings and urban design. Costs and benefits of city and rural lifestyles. Technology and the working environment. Population, resources and environment.
Prerequisites: PST 101 and PST 102

PSY 356  Forensic Psychology  3-3-0
This course provides broad overview of the issues and processes of Forensic Psychology. Topics include social/cognitive topics such as eyewitness testimony, jury decision making, and police procedures as well as abnormal/clinical topics such as the meaning of being unfit to stand trial, mentally disordered offenders and psychopathy.
Prerequisites: PSY 101 and PST 102

PSY 386  Psychology of Language  3-3-0
The aim of this course is to consider the psychological processes involved when we read. In particular, the skills that are acquired, the mechanisms involved, and the abilities that are essential will be examined. Why some people fail to acquire reading skills will also be examined. Answers to this question will focus on theoretical approaches to reading disability, and to the question of why some methods of remediation are successful.
Prerequisites: PSY 101 and PST 102

PSY 408  Psychology of Consciousness  3-3-0
A critical examination of consciousness in scientific psychology. Major topics are the nature of consciousness (e.g., consciousness and brain, states of consciousness), the methodology for studying consciousness (e.g., introspection), and the function of conscious experience (e.g., free will, conscious processing in cognition).
Prerequisites: PSY 101 and PST 102

Courses offered on an irregular basis.
