

# Steps to build an ELP300 in Business

**01**

## **Do your research**

Think about the type of project or organization you would like to work with and that complements your skills.

**02**

## **Meet the EL coordinator**

Time to determine feasibility of the project including, partners, project, supervisors, etc.

**03**

## **Confirm your supervisors**

You need to ensure a professor and an organizational supervisor for ELP300 evaluations.

**04**

## **Develop the project proposal**

Both the EL coordinator and Professor will guide you to write the project proposal (course outline).

**05**

## **Get it approved**

All ELP300's must be approved by the WSB. There are firm deadlines, so plan accordingly.

## **For more information**
